

## **UPLANDS SOILS MAPS**

**5635**

(May 1988)

In addition to issuing quadrangle maps, the Soil-Vegetation Survey has compiled from the more detailed two inch to one-mile scale, generalized soil maps printed at a scale of one-half inch to one mile. These maps show dominant upland soils associated with broad vegetation types by colors, and give other information on soils. These maps along with legends are available for the following areas:

- Upland soils of Mendocino County (except National Forest area).
- Upland soils of Lake County (all uplands).
- Upland soils of Glenn County (all uplands).
